

## Your Collaborative Intelligence Platform!

Sofvie is a proven software platform that connects every level of an organization. It enhances communication and redefines hazard and risk management in the workplace.

Sofvie is designed to align your culture, reduce incident and accident severity, and ultimately aid in minimizing life altering events in the workplace.

### Mobile App

A user-friendly data gathering and communication tool accessible to front-line workers through their mobile device.

### Web Platform

Sofvie offers customization, optimized dashboards, data storage, records management, live field insights and reporting.

## Features and Benefits

### Online and Offline Usage

Enjoy full functionality of the mobile app while offline. The app performs automatic and seamless sync with the network as soon as an internet connection is established.

### Paperless

Paper is hard to maintain and track. The instantaneous availability of data via digital form submissions is much easier to manage, refer and leverage than ever before.

### Collaborative Intelligence

Collaborating the information from human, machine, IoT and other forms of input create a fantastic way to identify and support the positive and negative risk potentials.

### Live Field Insights

Beautiful dashboards and interactive reporting to help guide and support the day to day activities for safe, quality production.

### Culture Enhancement

Sofvie reinforces your safety culture by adapting and molding to your needs. We enhance, streamline, and make your workflow leaner, easier and more functional.

### Software and Hardware Integration

Sofvie adapts and integrates with the software and hardware that you already use in your workflows to ensure that implementation is as easy as possible.

## Featured Modules

### Hazards

Record, Monitor and Correct hazards in the workplace.

### Positive Activities

Identify and manage positive work ethic and strong leadership.

### Incidents

Collect information in the field at ease and manage each case in depth centrally.

### Lessons Learned

Identify the most effective strategy to tackle future tasks.

### Decision Log

Track when decisions are made and access decision making history to prevent reoccurring missteps.

### Training Records

Employee training records can be seamlessly accessed and referenced in office and in the field.

### Risk Management

Take control of risks at every level of the organization with our multi layered risks module.

### Actions

Create and assign actions items, and resolve them from the office or in the field.

### Reporting

Access critical information with ease using our built in reporting engine.

### Field Form Submission

Submit forms for daily activities from the field or the office while online or offline.

### Form Data Management

Filter form lists to quickly manage, organize, export, and create reports.

### Document Review

Assign documents and action items to a member of your team to access or review.

### Administration

All-in-one module managing access and activities while setting specific data points required for review and analysis.

### Analytics

Data collection can provide critical insights aiding in making confident decisions when problem solving.
